

I thanet Associate Participants – Terms of Association

Introduction

An individual party or institution can be an **I thanet** Associate Participant if they are interested in the goals or technology areas of the **I thanet** project. All we require are the contact details and a Confidentiality Agreement to be signed by an authorised signatory of the prospective Associate's organisation.

Please, e-mail elenai@cing.ac.cy, The Cyprus Institute of Neurology and Genetics, to obtain a Confidentiality Agreement and a form for the details of the prospective Associate.

Benefits of being an I thanet Associate Participant

Registration will allow an **I thanet** Associate to:

- Receive an annual update on programme progress via e-mail
- Receive e-mail notifications of conferences and seminars where the **I thanet** project is presenting
- Receive e-mail notification of news within the SAFE Network
- Be invited to **I thanet** meetings or events (e.g. Workshops) that are open to **I thanet** Associates.

Being an **I thanet** Associate does not infer or imply membership of the **I thanet** project. Associates have no access to knowledge, know how or intellectual property generated within the Network.

A list of Associates may be published on the public area of the **I thanet** project website, consisting of the Associate's name and the institution/organisation to which they belong.
